

Summary

I'm a recent Mathematics graduate with a strong interest in data analytics and data science. During my academic journey, I completed various data analytics and machine learning projects that strengthened my skills in data collection, cleaning, analysis, visualization, and predictive modeling. These experiences allowed me to build proficiency in Python, R, Microsoft Excel, and statistical analysis for extracting insights and supporting data-driven decision-making. I'm eager to apply my analytical skills to solve real-world business problems while continuing to learn and grow as a data analyst.

Education

Yogyakarta State University

B.Sc. in Mathematics, Computational Mathematics. GPA 3.63/4.00

24 June 2026

Thesis: Comparative Performance Analysis of Single and Stacking Ensemble Models Using Multilayer Perceptron and XGBoost for Diabetes Mellitus Classification

Relevant Coursework: Decision Support Systems, Artificial Intelligence, Artificial Neural Networks, Web Programming, Object-Oriented Programming, Statistical Machine Learning, Data Mining for Statistics, Statistical Database.

Experience

Self-employee

Remote

Social Media Content Creator

December 2025 – July 2026

- Managed content strategy and daily operations across social media to increase brand visibility and audience engagement.
- Designed digital products, including Canva templates and scrapbook style designs for online distribution and promotion.
- Created and published engaging visual content tailored to each social media platform, growing the combined audience by 3000+ followers.

Badan Perencanaan Pembangunan Daerah (Bappeda) Kota Yogyakarta

Yogyakarta, Indonesia

Enumerator Intern (Riset Inovasi Daerah dan Pengendalian)

July – August 2024

- Conducted field surveys and collected data from 50+ public facilities across Kota Yogyakarta to support regional development research.
- Verified and maintained the accuracy of survey data before submission, ensuring data quality for further analysis.
- Compiled and organized survey records into structured dataset to support reporting and public facility monitoring.
- Collaborated with the project team to resolve data inconsistencies and complete field data collection within project timelines.

Leadership & Activities

National Mathematics Competitions and Seminar XXXII

Proceedings and Publications Coordinator

July 2023 – March 2024

- Led the team by assigning tasks, monitoring progress, and ensuring all publication activities were completed according to schedule.
- Coordinated communication between the authors and reviewers throughout the submission review and revision process, facilitating timely feedback and revisions.

- Managed the conference proceedings website by maintaining submission information, preparing article templates, and publishing submission guidelines for authors.
- Tracked manuscript submissions and revisions for 24 papers, ensuring adherence to publication requirements and successful proceedings publication.

Media Visit Program 2023

Publication, Documentation & Design Coordinator

July – October 2023

- Led the team by coordinating tasks and monitoring project progress to ensure timely completion of deliverables.
- Designed and reviewed promotional materials and visual assets to maintain consistent event branding.
- Produced and coordinated digital content for social media platforms and event publications.
- Documented event activities through photography and videography, organizing media assets for post-event reporting and future publication.

Mathematics Laboratory Study (Orientation Program)

City, State

Publication, Documentation & Design Staff

May – September 2023

- Designed promotional materials and visual assets for event branding.
- Created digital content for social media and event publications.
- Assisted with venue decoration to support the event setup and participants experience.
- Prepared and managed the division's budget plan to support the event activities.

Media Visit Program 2022

City, State

Publication, Documentation & Design Staff

September – October 2022

- Designed promotional materials and visual assets for event branding.
- Assisted in creating digital content for social media and event publications.
- Documented event activities and organized media assets for post event reporting.

Skills

- **Technical:** Python, SQL, R, Microsoft Excel, Power BI (Beginner), Git & GitHub (Basic), Microsoft Word, Canva.
- **Language:** English (Intermediate), Indonesian (Native)
